

# DCR Mate

NEW 'DUST FREE' CLEANING FROM TEKNEK, THE WORLD LEADER IN CONTACT CLEANING TECHNOLOGY

The new Teknek DCR Mate is a manual cleaning system for the most demanding clean room applications. Combining the well proven DCR range (dust cleaning roller) with the unique adhesive roll 'Mate' fitted with Teknek's Pre-Sheeted Adhesive Rolls offers a small, convenient work station. Using the DCR hand roller to first remove dry unattached particles from any flat surface, the operator then rolls the DCR against the pre-sheeted adhesive. Pressing down on the lever support roller rotates the adhesive roll to automatically transfer the particles and clean the DCR. Particles remain permanently trapped on the adhesive.

Pushing down on the lever support roller rotates the adhesive roll.

Pre-sheeted adhesive roll for easy removal of contaminated sheet.

PATENT PENDING

## Pre-Sheeted Adhesive Rolls

The innovative Pre-sheeted adhesive roll allows for easy removal of the contaminated outer layer of the adhesive without the need for cutting with a knife. This means no cutting dust is created and there is no wastage of fresh adhesive. When the outside layer of the adhesive roll has been fully used, the operator simply removes the pre-sheeted layer, which exposes a new area of fresh adhesive.

The DCR Mate can be used horizontally on a work top or mounted for vertical use. The DCR Mate is also suitable for Class 100 clean room applications and removes the need to tear off paper pads that other systems require. This prevents extra paper dust being introduced in the clean environment. New adhesive rolls can be simply and quickly fitted onto the system for the next period of use.

Pre-cut sheet – no knives required.

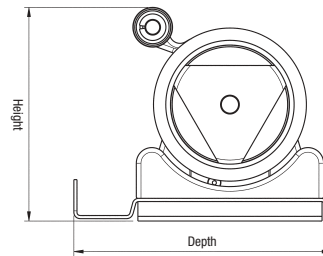

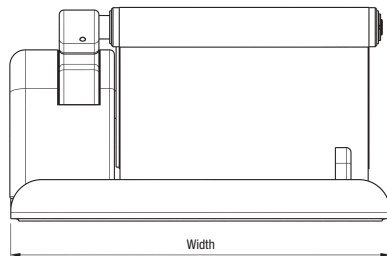

DCR Mate Series
